Natalya Kaspersky, InfoWatch Group of Companies CEO, Kaspersky Lab co-founder

Natalya Kaspersky is a co-founder of Kaspersky Lab, one of the world's largest antivirus companies, and CEO of InfoWatch Group of Companies, working in the sphere of information security.

During her 10-year tenure at Kaspersky Lab Natalya turned a small group of enthusiasts into a world-class international IT company with annual revenues of hundreds millions USD.

In 2003 being Kaspersky lab CEO, Natalya initiated the set-up of a daughter company InfoWatch, focused on developing solutions to protect corporate confidential data from leakage.

Natalya's global business and IT-marketing expertise helped InfoWatch to become a leader of the Russian DLP market and to start international expansion.

In 2007, Natalya became the CEO of InfoWatch and with a newly formed Directors' board started regional expansion and company's product portfolio enhancement.

In 2010, InfoWatch together with Ashmanov and Partners created a company "Kribrum" which offers a new generation of social media monitoring and company reputation management solutions.

In 2011, InfoWatch acquired a German company Cynapspro GmbH developing endpoint data protection solutions for SMB companies. Thus InfoWatch turned into a Group of companies.

Earlier this year InfoWatch acquired a Canadian company Appercut Security, an innovate technology developer, focused on business application source code analysis, finding malicious backdoors and protecting against insider programmers.

In October 2012 Natalya Kaspersky has taken over 16,8 percent of German antivirus security company G Data Software AG shares and was elected in the company's supervisory board.

Today InfoWatch Group of companies sells its products globally, including Germany, Switzerland, UAE, Bahrain, Saudi Arabia, Malaysia, Singapore, etc. The Group also includes "Natalya Kaspersky Innovation Center", which develops new technologies for further submitting to the Group to commercialize.

Natalya Kaspersky is an active participant of international business community life. She is a member of several IT committees of Russian governmental organizations, and of the Russian-British chamber of commerce Advisory Councils.

Natalya holds multiple awards of top notch Russian and International IT and Business Associations. Natalya was born in 1966, 5th of February. She graduated from Moscow State Institute of Electronic Engineering with a master's degree in Applied Mathematics, and has a bachelor's degree in Business of The UK Open University. Natalya speaks English and German.
